Subject: OECA Updates for 8/17/17 (Due 8/15 10:00 AM)

Hi all —

Attached are the draft OECA updates for the period ending 8/17/17. Please send new items and your proposed edits to existing items to Ellen and me by 10:00 am Tuesday 8/15 (and the earlier, the better).

To avoid a last minute scramble (primarily by me) on 8/17, I have highlighted dates indicating matters that may have actions in June, July, August or September. Please be especially careful to ensure that these items and estimated action dates are as up-to-date as possible. Also, remember that a one-pager needs to be developed or updated by the team if the action date is expected in two weeks or less.

Since it has been a while, please review the following tips before you start (or before you conclude you're finished without reviewing at least one of the reports).

- Review each category to determine whether new matters may fit.
- For new matters, be sure to lead with the state's role, even if the state has no role.
- Note if a matter directly relates to oil and gas exploration and production.
- Include a note if a matter is part of a national enforcement initiative.

- If you have a CD going through public comment, indicate whether there are: no comments/no new outside interest, no significant adverse comments/no new outside interest, or public comments/interest under review.

Finally, if you update the document in Word, rename the document *only* by substituting *your first or last name* for the word *master* in the title.

Thanks as always for staying on top of this.

Chuck
